## Alternative Energy - The Multiple-Choice Question

Everyone has heard the terms “alternative energy” and “green technology.” But what is alternative energy - alternative to what? Alan Richrod will discuss several alternative energies, including wind, solar, geothermal, and fuel-less transportation in straightforward language that’s easy to understand. The presentation will be held on Saturday, April 3 at 2 p.m. at the Aberdeen Timberland Library.

Richrod will also examine what’s on the horizon for the new green technologies. “Grays Harbor Washington is a potential “gold mine” of alternative energy and could lead the way to future centuries of clean energy and energy independence,” he stated.

A technical researcher and writer, Richrod has avidly studied alternative energy resources for the past 30 years and has often given presentations on the subject. Because the industry is changing so rapidly, Richrod will bring new information to this talk. He will take questions after the presentation.

The program is sponsored by the Friends of the Aberdeen Timberland Library. The library is located at 121 E Market Street. For more information, please call (360) 533-2360 or go to [www.TRL.org](http://www.TRL.org).
